

**AMENDMENTS TO THE CLAIMS**

1. (Currently amended) A direct-type backlight unit for a flat panel liquid crystal display, comprising:
  - 5 a plurality of lamps installed within a housing;
  - a reflection plate installed under the plurality of lamps in the housing; and
  - a metal diffusion film with a plurality of apertures thereon installed above the plurality of lamps for diffusing light generated by the plurality of lamps.
- 10 2. (Currently amended) The direct-type backlight unit of claim 1 wherein each of the plurality of lamps ~~are~~ is a cold cathode fluorescent lamp (CCFL).
3. (Canceled)
- 15 4. (Previously presented) The direct-type backlight unit of claim 1 wherein the diffusion film has a thickness of less than 0.5mm.
5. (Previously presented) The direct-type backlight unit of claim 1 further comprises a diffusion sheet located on the metal diffusion film.
- 20 6. (Original) The direct-type backlight unit of claim 1 wherein at least one heat-dissipating piece is disposed at a periphery of the diffusion film.
7. (Original) The direct-type backlight unit of claim 6 wherein the heat-dissipating  
25 piece is made of metal.
8. (Original) The direct-type backlight unit of claim 6 further comprising a heat exchanging means connected with the heat-dissipating piece.
- 30 9. (Original) The direct-type backlight unit of claim 8 wherein the heat exchanging means is a heat pipe.

10. (Original) The direct-type backlight unit of claim 1 wherein the apertures on the diffusion film have different diameters/dimensions.
- 5 11. (Original) The direct-type backlight unit of claim 10 wherein the diameter/dimension of the apertures directly above the lamps is smaller than the diameter/dimension of the apertures not directly above the lamps.
12. (Original) The direct-type backlight unit of claim 1 wherein the diameters/dimensions of the apertures are the same.
- 10 13. (Original) The direct-type backlight unit of claim 12 wherein the diffusion film has a highest aperture packing density at an area directly over the lamps.
- 15 14. (Currently amended) The direct-type backlight unit of claim 1 wherein the apertures are circular[[,]] or rectangular, ~~or any other shape~~.
- 20 16. (New) A direct-type backlight unit for flat panel liquid crystal display, comprising:  
a plurality of lamps installed within a housing;  
a reflection plate installed under the plurality of lamps in the housing;  
a diffusion film with a plurality of apertures thereon installed above the plurality  
25 of lamps for diffusing light generated by the plurality of lamps;  
a heat-dissipating piece directly connected to the diffusion film; and  
a heat exchanging means connected with the heat-dissipating piece.
- 30 17. (New) The direct-type backlight unit of claim 16 wherein the diffusion film has a thickness of less than 0.5mm.
18. (New) The direct-type backlight unit of claim 16 further comprises a diffusion

sheet located on the metal diffusion film.

19. (New) The direct-type backlight unit of claim 16 wherein the heat-dissipating piece is made of metal.

5

20. (New) The direct-type backlight unit of claim 16 wherein the heat exchanging means is a heat pipe.
